SUMMARY

Frontend Software Engineer with 7+ years of experience building websites and digital products, beginning with web development and graphic design before university and progressing into professional software engineering.

I primarily work with JavaScript, React, and Next.js, with experience building responsive interfaces, developing frontend architecture, integrating REST and GraphQL APIs, and working with backend technologies when a project requires it. I enjoy taking an idea from a design or requirement and turning it into a working product.

I have worked on products across e-commerce, education, business management, hospitality, supermarket management, and coaching platforms. My experience includes both independent product development and working with engineering teams, including testing, debugging, deployment, hosting, and ongoing maintenance.

I also have experience leading and mentoring developers. As Software Director at university, I helped students transition into software development and continued supporting many of them after my term.

EDUCATION

Ekiti State University
Bachelor of Science (B.Sc.) in Computer Science *Graduated: 2025*

EXPERIENCE

Frontend Software Engineer | Contract 2024 – Present
Emviron

- Built the frontend architecture for Talentta.africa, taking responsibility for the frontend implementation from development through completion.
- Built responsive and user-friendly interfaces using JavaScript, React, and Next.js.
- Integrated frontend features with backend APIs and handled application data and user interactions.
- Translated product requirements and designs into functional interfaces.
- Built reusable components and maintained consistent UI patterns across the application.
- Debugged frontend issues and worked through implementation challenges during development.
- Collaborated with backend developers to ensure frontend and backend features worked together correctly.
- Worked on preparing the completed application for production.

Software Engineer | Contract / Team 2024 – Present
ArtizanSquare

- Work with a development team to build and maintain the ArtizanSquare platform.
- Contribute to both frontend development and selected backend functionality.
- Build responsive interfaces and reusable components for the web application.
- Integrate frontend features with backend APIs and application services.
- Participate in testing, debugging, and improving features before and after release.
- Contribute to hosting and deployment of the platform.
- Work with the team on the development of the platform's mobile application.
- Collaborate with other developers to plan and implement new features and improvements.

Frontend / Full-Stack Developer | Contract 2026 – Present
Tech-Builder

Project: https://eloweb.netlify.app

- Currently working on ELO Business Web, a business-focused web application.

- Build responsive frontend interfaces and application features.
- Work across frontend and backend functionality as required by the project.
- Integrate frontend features with backend services and APIs.
- Collaborate with other developers throughout planning, development, testing, and delivery.
- Contribute to debugging, refinement, and deployment of production features.

ICT / Digital Support September 2025 – August 2026

National Youth Service Corps

- Completed a one-year National Youth Service programme.
- Supported technology and digital activities within the organization.
- Served as Social Media Manager from July 2026 to August 2026.
- Managed social media activities and helped create and organize digital content.
- Used digital tools to support communication and improve the organization's online presence.

PROJECTS

Novaré | novarewear.com | Founder & Full-Stack Developer Built and continue to maintain my own e-commerce platform from the ground up.

- Designed and developed the complete frontend and backend.
- Built the customer-facing shopping experience and application workflows.
- Integrated third-party services required by the platform.
- Implemented payment and other external service integrations.
- Set up the production environment, hosting, and domain.
- Managed deployment, debugging, maintenance, and ongoing improvements.
- Took responsibility for the technical development of the product from the initial idea through production.

Talentta.africa | Frontend Software Engineer | Emviron

- Built the frontend application and its overall frontend architecture.
- Developed responsive interfaces and reusable components.
- Integrated the frontend with backend APIs.
- Implemented user-facing application features.
- Worked closely with backend development to ensure smooth communication between the frontend and server.
- Took the frontend from development through completion.

ArtizanSquare | Software Engineer

- Worked on the web platform across frontend and selected backend features.
- Built and improved application features and responsive interfaces.
- Integrated frontend functionality with backend APIs.
- Contributed to the mobile application alongside the development team.
- Participated in testing, debugging, hosting, and deployment.

Mentra | Full-Stack Developer A coaching and mentorship platform currently under development.

- Responsible for both the frontend and backend development of the platform.
- Building the application architecture and user-facing experience.
- Developing responsive interfaces and application functionality.
- Building and integrating backend APIs.
- Managing communication between the frontend and backend.
- Working on authentication, application workflows, and other core platform features.

Velli Supermarket | Full-Stack Developer A supermarket management platform currently under development.

- Responsible for the frontend and backend development.
- Building the web application architecture and user interface.
- Developing features for supermarket operations and management.
- Integrating frontend functionality with backend services and APIs.
- Working on the application with scalability and real-world business use in mind.

Aiden | Frontend / Full-Stack Developer A hospitality platform designed for hotels and resort centres.

- Contributing to the development of the platform and its application features.
- Building responsive interfaces and user-facing functionality.
- Working with the development team across frontend and backend requirements.
- Integrating application features with backend services.

ELO Business Web | Frontend | Tech-Builder

- Working on a business-focused web platform as part of a contract development project.
- Building responsive interfaces and application features.
- Working across frontend architectures.
- Collaborating with other developers to implement, test, and refine features.

TECHNICAL SKILLS

JavaScript
TypeScript
HTML5
CSS3
React.js
Next.js
Nuxt.js
React Native
Tailwind CSS
Bootstrap
Material UI
Framer Motion
React Query
Node.js
Express.js
Django
PHP
Laravel
REST APIs
GraphQL
Third-Party API Integration
PostgreSQL
MySQL
MongoDB
Firebase
Supabase
Git
GitHub
Postman
Vercel
Render
Netlify
Responsive Design
Frontend Architecture
Component-Based Development
Authentication
Form Handling and Validation

State Management
Testing
Debugging
Performance Optimization
Accessibility
CI/CD
Git Branching
Pull Requests
Code Reviews
Team Collaboration

EARLY WEB & DIGITAL DESIGN EXPERIENCE

Web Development & Graphic Design

7+ Years of Experience

Before and during university, I developed websites and worked on graphic design projects, building my foundation in digital design, user interfaces, and web development.

This early experience helped me develop a strong understanding of visual presentation and how design decisions affect the usability of a website. Over time, I progressed from designing and building websites into developing more complex, production-ready web applications and full-stack systems.

LEADERSHIP & MENTORING

Software Director

Ekiti State University | One Academic Session

- Served as Software Director for a full academic session while in 400 level. - Helped students who were new to technology learn software development and understand practical development workflows. - Guided students as they developed their technical skills and started building projects. - Helped several students transition from having little or no development experience into actively learning and working in technology. - Supported students beyond the leadership period and continue to maintain relationships with many of those I mentored.
